Mobeen Nasir

Personal information

Name	Mobeen Nasir
Address	Multan, Punjab, Pakistan
Telephone	+92 313 6701631
Email	mubeennasir117@gmail.com
LinkedIn	linkedin.com/in/mobeennasir
GitHub	github.com/mobeennasir
Portfolio	mobeennasir.github.io/portfolio/
ORCID	0009-0006-8660-6557
Date of birth	18 February 2006
Nationality	Pakistani

Profile

Final-year BS Biotechnology student at Bahauddin Zakariya University, Multan, applying for fully funded master's programmes abroad. Research interests in applied microbiology, bioremediation, and plant-growth-promoting rhizobacteria (PGPR), supported by hands-on wet-lab internships and self-directed bioinformatics work.

Work experience

Sep 2026 – Present | Independent Researcher, Computational Biology (self-directed)

- Building bioinformatics pipelines for variant interpretation, including the LDLR prioritization project below.

31 Jul – 25 Aug 2026 | Volunteer Intern — Soil Microbial Resources and Ecology Laboratory, Land Resources Research Institute (LRRI), NARC, Islamabad

- Four weeks of hands-on work in basic microbiological techniques: bacterial isolation, purification, and biochemical characterization.

15 Jun – 30 Jul 2026 | Research Intern — National Institute for Genomic and Advanced Biotechnology (NIGAB), NARC, Islamabad

- Internship on “Basic Molecular Biology Techniques”: PCR, tissue culture, and core microbiology methods.

Education and training

2023 – 2027 (expected) | BS Biotechnology — Bahauddin Zakariya University (BZU), Multan, Pakistan

- CGPA 3.73. Coursework focus on molecular biology, genetics, and bioinformatics.

2021 – 2023 | Intermediate (Pre-Medical) — KIPS College

- Higher secondary education, pre-medical stream.

Projects

2026 – Present (in progress) | BS Capstone Project — Isolation and Characterization of Rock Phosphate-Solubilizing Rhizobacteria from Wheat Rhizosphere (Supervisor: Dr. Tahir Naqqash, IMBB, BZU)

- Planned pipeline: rhizosphere soil isolation, PVK screening, qualitative halo assay, quantitative broth assay with pH tracking, IAA / siderophore / ACC deaminase trait screening, and a wheat pot trial under phosphorus-deficient conditions.

2026 | LDLR Variant Prioritization Pipeline — Independent project (github.com/mobeennasir/LDLR-Variant-Prioritization)

- Python pipeline prioritizing LDLR variants linked to familial hypercholesterolemia: narrows 1,187 candidate variants to 222 high-confidence pathogenic calls through layered evidence filters.

Publications and manuscripts

- **Preprint:** Nasir, M. (2026). A High-Throughput Programmatic Pipeline for Computational Reclassification of Variants of Uncertain Significance in LDLR: Structural Evidence for Disruption of the LDL-Receptor Class A Ligand-Binding Repeats. Zenodo preprint. doi.org/10.5281/zenodo.23323333.
- **Under review:** Same manuscript under review, Journal of Human Genetics. Manuscript ID: JHG-26-815. Submitted 29 October 2026.

Personal skills

Languages	Urdu — mother tongue; English — fluent (working language of study)
Laboratory skills	Molecular biology, PCR, tissue culture, microbiology (isolation, purification, biochemical characterization)
Bioinformatics	Python (modular CLI tools), BLAST, Entrez Direct, NCBI Datasets, Git, Linux/WSL
Other skills	Scientific writing, data analysis

Certifications

- Nov 2026 — Command Line Tools for Genomic Data Science, Johns Hopkins University via Coursera.
- Nov 2026 — Introduction to Industrial Bioprocess Development, Technical University of Denmark via Coursera.
- Nov 2026 — Algae Biotechnology, University of California San Diego via Coursera.
- Oct 2026 — Industrial Biotechnology, University of Manchester via Coursera.
- Jul 2026 — Introduction to Genomic Technologies, Johns Hopkins University via Coursera.
- Jul 2026 — Introduction to Data Analysis using Microsoft Excel, Coursera project certificate.
